

Water supply Principles

- Water must comply with the German potable water standard
- potable water is considered as food
- water must be supplied 24 hours a day and 365 days a year
- 120 l/ soldier and day (empirical value gained from operations: up to 170 l/ day)

POTABLE WATER SUPPLY

Experiences

- Water supply and treatment experts must always be included in the reconnaissance team
- Planning of several ways to exploit and supply water (because of seasonal and tactical variations)

Experiences

- Ensuring timely, qualified training of personnel because a food product is produced here
- Taking into consideration these experiences, the commander will not face any problems with the resource of water and can commit himself in peace to the original mission !!

Handover from hell
